

Alden ONE is an essential set of elements to help effectively manage utility joint use assets.

Alden ONE software focuses on business process automation for joint use utility assets.

Standardize utility asset data and create repeatable processes with end-to-end project oversight.

ALDEN ONE

Developed from 20+ years of industry experience, Alden ONE's standard processes meet common industry-standard milestones, timelines, and data elements. Our experience in serving electric utilities, communications, and engineering providers has produced a standard toolkit to meet the needs of all utility stakeholders. Whether a permit application, transfer notice, or pole correction, Alden ONE's business processes enable successful outcomes.

REPEATABLE

Alden ONE offers efficient, repeatable experiences for your team and your joint use partners. When processes are streamlined and data requirements are standardized, daily activities become a comfortable experience with clear, consistent expectations.

ORGANIZED

Alden ONE is an asset repository and activity management platform that centralizes communications related to activities between stakeholders.

As a centralized document repository, Alden ONE organizes collateral storage and enables efficient information sharing inside or outside your organization.

EXPANDABLE

Alden ONE's standard processes are the foundation of the software. Additional features, functionality, and connected applications are available, including third-party integrations.

Manage Assets

- Poles
- Attachments
- Towers
- Streetlights
- Conduit

Automate Processes

- Permit Applications
- Surveys
- Make-Ready
- Inspections
- Pole Transfers & Corrections

Contracts & Billing

- Store Contracts
- Manage Contract Renewals
- Update COI & Bonds
- Create & Process Invoices
- Send or Receive Payments

Data Analytics

- Executive Reporting
- Operation Reporting
- Compliance Reporting
- Data Lake & Dashboards
- Data Export

THE PROCESS

- Product demo of Alden ONE
- Initial calls to discuss solution goals
- Training & educational materials
- Production go-live support

UPGRADES & ENHANCEMENTS

- IT support for data prerequisites
- Additional customizing of mapped fields or business processes
- Extracting data from client's GIS
- Data cleansing
- Interfaces to other client applications & tools

SAVE TIME THROUGH AUTOMATION

UTILITY OWNERS

Protect your company and ensure all work is completed within the regulated timelines.

Safe. Reliable. Predictable.

ATTACHERS

Speed up deployments and normalize disparate data sets in one central location.

Fast. Central. Scalable.

ENGINEERING FIRMS

Increase trust with real time, transparent work organized into buckets.

Know more. Do more.

ONE PLATFORM. MULTIPLE ROIs.

ADMINISTRATIVE BENEFITS

- \$2.60/pole increase in rental billing
- \$0.60/pole in back billing (recurring)
- Single ERP for real estate

OPERATIONAL BENEFITS

- \$0.60/pole in operational efficiencies
- \$2.28/pole in penalties avoided
- \$4.00/pole in make-ready recovery

DEPLOYMENT BENEFITS

- Increase speed to market by 42 days (avg.)
- 10% increase in employee productivity
- 1 FTE saved per 100 applications

GAIN CLARITY & CONTROL WITH ALDEN ONE

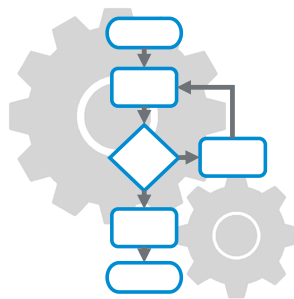

ASSETS

Link assets and activities in one central platform to ensure work is completed safely and on time.

(Poles, attachments, conduit, towers, ROW, contracts)

ACTIVITIES

Let business process automation power your workflows and create the accountability needed for reliable outcomes.

INTELLIGENCE

Automated reports and dashboards built for administrative, operational, and executive insights deliver accurate, reliable intelligence to keep your teams in the know.
